

Review of governor attendance, 2012-18

Data is taken from the Governors' Attendance Register.

The register excludes staff governors and visits made outside school.

¹ John Harvey's record sheet for 2013-14 was missing, so it has been assumed that he attended the same number of meetings as in the previous year.

Expected level of attendance would be 6 governors' meetings and 6 committee meetings, times 10 non-staff governors, making a total of 120, plus a few extras.

Total number of visits calculated using governor visits recorded on the paper version only. I believe we are under recording attendance especially for general school visits where the folder is not always accessible.

Could we investigate using an online log (shared spreadsheet to update attendance)? This would also make creating the attendance report much more straight forward.
